DESCRIPTION OF PROPOSED WORKS

Existing Basic Management, Incorporated 40-inch pipe line or

State manner in which water is to be diverted, whether by dam or other works, whether through pipes, ditches, flumes, or other conduits. If water

proposed Las Vegas Pumping Project pipe line

is to be stored in reservoirs, it should be so stated and the location of the reservoir should be given with reference to the legal subdivisions.

5. Estimated cost of works Approximately \$2,500,000.00

6. Estimated time required to construct works 12 months

Water to be delivered to existing 17 M.G. terminal reservoir at Henderson then after filtration to the distribution system.

7. Remarks The City of Henderson needs more water than it can obtain from either B.M.I. or the water District. According to the preliminary report on the Las Vegas Pumping Project, the B.M.I. 40-inch line should have ample capacity for the City of Henderson for many years. Therefore, it is believed that B.M.I. could not limit us to 5 M.G.D. if Henderson had its own water appropriation.
